

Atty. Dkt. No. A00067US

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claims 1-49 (canceled)

Claim 50. (new) A computerized method of aggregating and displaying internet account information on a processor of a client, the client processor having a display, the client processor operatively connected to a host server processor via the Internet, comprising:

displaying a view page on the display, said view page having three columns, each of said columns having at least one monitor therein,

populating said monitors with links to selected web-sites,

retrieving data from said selected web-sites,

processing said data retrieval by scripting,

accessing said data using a script knowledge database,

connecting to said selected web-sites by opening a secure socket connection,

displaying said retrieved data in said monitors on said view page, and

providing links to a user to access said selected web-sites by automatic login.

Claim 51. (new) The method of claim 50, wherein retrieving data from said selected web-sites comprises, for each said web-site that requires a login protocol:

retrieving a web-site's name from a user web-site account database on said host processor,

retrieving and decrypting the user's login information for said web-site,

retrieving said web-site's script from an institute script knowledge database,

Atty. Dkt. No. A00067US

executing a programmatic data extraction routine using the user's login information and
said web-site's script,

retrieving updated data from said web-site,

formatting said updated data for display,

encrypting said update data,

storing said updated data,

retrieving and decrypting said updated data, and

displaying said updated data on said view page.
